1

This is the name and address details of the Source Energy Co. customer.

2

This is your unique Source Energy Co account number specific to you and the supply address.

3

The opening balance details any credit amounts, outstanding or overdue amounts you may have on your account.

4

The new charges includes this bills charges only for the most recent billing period.

5

The total includes any credits or outstanding amounts you may have plus any new charges.

6

This is the Source Energy Co regulated tariff that you are on. For further details please visit <http://sourceenergyco.com.au/fine-print/>

7

The billing period is also the supply period or the start and finish date of the meter reads for this invoice.

8

The Average daily consumption is displayed in kWhrs (units) and average daily cost in \$. It is calculated by imported energy from the exported energy and dividing by the billing period (number of days). If, you export more than you import it will be shown as a negative. It does not show how much you actually consumed onsite as the meter can not determine how much energy you consumed directly from the solar.

9

The total energy import shows you exactly how much energy you imported (consumed) in your apartment during the billing period and charge per unit or kWhrs from Source Energy Co.
